### DETAILED ACTION

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1,10,19 and 28-30 are rejected under 35 U.S.C. 112, first paragraph, as being single means/step claims.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,10,19 and 28-30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Leng (“Compression of Aircraft Aerodynamic Database Using Multivariable Chebyshev Polynomials”).

Leng clearly discloses a data compression using Chebyshev polynomials as claimed.

5. Claims 1,10 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Potter (4,658,367).

Potter discloses a data compression using Chebyshev polynomials as claimed (see col.13, lines 22-51).

6. Claims 2-9,11-18 and 20-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
